Silikal® reactive resin floors: hygienic, safe, fast

Silikal flooring makes the grade both at vintners and throughout the beverage industry. It can withstand huge the mechanical loads brought to bear on it by plant and equipment, heavy tanks and transport vehicles. It can resist attack by acids or lye, can be cleaned easily and thoroughly, can go down literally overnight and ... also looks great. Here are three examples of many for the successful

application of highly durable and seamless monolithic surfaces made from reactive resins: at a vintner's, a wine importer's and at the Technical Center for Beverage Sciences at the Wiesbaden Polytechnic Institute in Germany. Both as a system in a new building as well as a successful renovation for warehouse and production facilities, packaging plants, stairwells and hallways ...

Skillfully applied by qualified installers and the new floor is fully cured and ready for action within one hour. A perfect way to keep your operation running wide open.

Expect more from your floor.
